

Accelerator(s) will act as a resource and help facilitate delivery of projects within a designated geographic region while promoting investment in covered infrastructure projects. The Further Consolidated Appropriations Act, 2020 appropriated \$5 million to carry out the Program.

The goal of this RFI is to engage interested parties to obtain input into the most effective, transparent and expedient ways to structure and deliver the Program. Respondents to this RFI are encouraged to provide related information and answers to one or more of the following:

Structure

(1) What would be an effective form of the accelerator that could influence the development of infrastructure projects, and what type of structure and authority would be required for the establishment of a regional accelerator? Are there examples of such entities from around the country and abroad, or in other sectors that could be used as a model for the Program?

(2) What barriers such as regulatory, technical and institutional (public or private) would hinder implementation? What authority should the accelerator(s) have to effectively carry out its mission?

Geographic Diversity

(1) What is the most effective regional approach in achieving geographic diversity?

(2) What consideration should be given to urban versus rural areas, regional verses statewide or multi-State accelerators?

(3) Given the appropriated amount (\$5 million), what would be the optimum range and most effective number of awards for regional accelerators? What would be an appropriate size program to consider in addressing the needs of priority infrastructure projects in rural areas?

Qualifications

(1) What resources, competencies and experience would be required from and within an accelerator? The approach should consider the resources required in accelerating the development of smaller rural projects and assisting inexperienced or under-resourced regions.

(2) If external resources and expertise would be contemplated, what would be the acquisition strategy while ensuring transparency and accountability?

(3) What is the best way to conduct an effective and transparent selection process? What evaluation criteria should the Bureau consider?

Approach

(1) What is the most effective approach to achieve the goals of the Program through an accelerator? In responding, please address considerations for the creation, selection and designation of regional accelerator(s).

(2) What actions are required to plan, implement and assess effectiveness of regional accelerators? If your response considers a phased approach, what would be the activities, resources and timelines for each phase? If new entities are considered, how much time would be needed to stand up a regional accelerator and what would be the major challenges?

(3) How could an accelerator leverage the Federal funding beyond the initial Federal support? If feasible, could a standalone, self-funded and sustainable model continue to deliver the intended benefits under the Program?

(4) Rural transportation infrastructure is of critical interest to the Department. How could Regional Infrastructure Accelerators assist in supporting priority programs in the region such as Rural Opportunities to Use Transportation for Economic Success (ROUTES) and the Bureau's Railroad Rehabilitation & Improvement Financing (RRIF) credit program that further accelerate projects?

Measures of Success

(1) How would Bureau assess and monitor the success of the program in accomplishing the goals and objectives?

(2) What would be appropriate key performance indicators that help measure the effectiveness of this demonstration program? Please consider the planned activities under the Program as indicated in Section 1441 of the FAST Act.

Other Considerations

(1) What else should the Bureau consider (in addition to the statutory criteria in Section 1441 of the FAST Act) and/or do to ensure an effective and successful regional accelerator program?
